ben@agaric.coop

Goals for Humanity

... by way of a software project

- We can communicate widely with one another.
- We stay in control of our communication.
- We can earn livings which gives a degree of freedom.
- We can gain the most power possible over our own lives.
- We use the experience in collective action this entails to establish justice and liberty for all.

What Leads to Long-Term Success?

- New contributors with new ideas
- People continue to join and pay to use
 - Requires easy, low-cost way for people to get started
 - Means new users also bring their needs and ideas
- People feel they have meaningful control.
- People do have meaningful control.

Illustrious Drupalistas on Drupal today

“It's no longer a do it in your garage, exciting thing, it's not fun.”

—Diliny Corlosquet

“It needs a team of trained engineers to support.”

—Jim Fisk

DRUTOPIA

Join the movement.
Build a Drupal for the grassroots.

I N D I E W E B C A M P

The Plan

1. Build a web sites as a service platform providing sites for grassroots groups and nonprofits.
2. Use the revenue to build the best platform for grassroots groups, activists, organizers, and movements, including communication and relationship management tools.
3. Use that revenue and membership to build the most powerful communication network in the world, under democratic control.
